

**CAMBRIDGE INTERNATIONAL EXAMINATIONS**

Cambridge International General Certificate of Secondary Education

## **MARK SCHEME for the March 2016 series**

### **0452 ACCOUNTING**

**0452/22**

Paper 22, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the March 2016 series for most Cambridge IGCSE<sup>®</sup> and Cambridge International A and AS Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

6 (a)

Ratio	Annie	
Rate of inventory turnover to <b>two</b> decimal places	7.26 times	(2)
Percentage of profit for the year to capital employed (ROCE) (to <b>two</b> decimal places)	4.13%	(2)
Trade receivables collection period (rounded up to the next whole day)	40 days	(2)

Calculations to show the breakdown of marks:

Rate of inventory turnover

$$\frac{30\,500}{(3\,600 + 4\,800) \div 2} \text{ (1) whole formula} = 7.26 \text{ times (1)}$$

Percentage of profit for the year to capital employed

$$\frac{3\,800}{92\,000} \text{ (1)} \times \frac{100}{1} = 4.13\% \text{ (1)}$$

Trade receivables collection period

$$\frac{4\,350}{40\,000} \times \frac{365}{1} \text{ (1) whole formula} = 39.69 = 40 \text{ days (1)} \quad [6]$$

(b) Different type of goods (1)

**EITHER** Food has a lower gross profit margin than clothing (1)

**OR** The food store is cutting prices to sell more goods (1) [2]

(c) Total revenue from sales may increase so profit may increase (1)

Customers may look for cheaper suppliers, so profits may actually fall (1) [2]

(d) Mark and Tony (1)

Annie's expenses/revenue is 14.25%: Mark and Tony's ratio is 5.15% (1) [2]

(e) Different type of goods (1)

**EITHER** Food sells more quickly than clothing (1)

**OR** Food is in greater demand than clothing

**OR** Food store will probably have a lower value of inventory

**OR** Food is cheaper than clothing (1) [2]

(f) **EITHER** Reduce inventory levels (1)

**OR** Increase sales activity (1) [1]

(g) Increase profit for the year/increase efficiency/use resources more effectively

Reduce long term liabilities

**Any 1 (1)** [1]
