Paper 1

October/November 2010
2 hours 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

#### **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examine	r's Use

This document consists of 20 printed pages.

iner's

(a)	State <b>three</b> reasons why a computer system failure might occur (malfunction).  1	For iner's
	1	Tick
		ac.C.
		THE STATE OF
	2	
	3	
	[3]	
(b)	One effect of a computer system failure is the loss or corruption of files. State <b>one</b> way of recovering a file if it has been lost or corrupted.	
	[1]	
(c)	How is it possible to ensure illegally accessed files are unreadable?	
	[1]	

Name:	 	 	 	 	 	

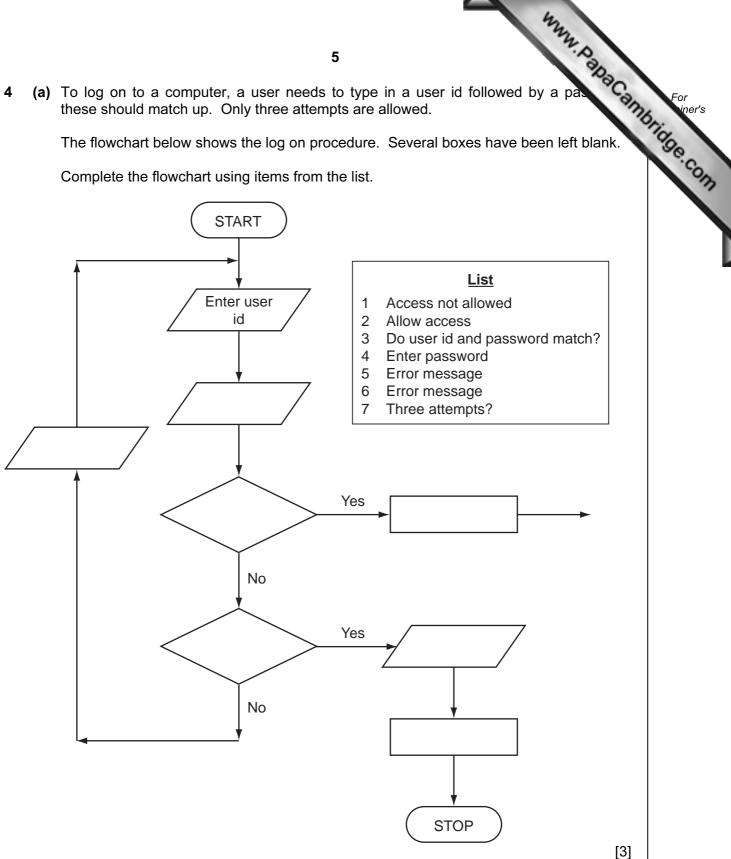

(b)	Give <b>one</b> advantage of having computers connected on a network.	
		[1]
(c)	Give <b>one</b> disadvantage of having computers connected on a network.	
		[1]

[2]

(a) To log on to a computer, a user needs to type in a user id followed by a pas these should match up. Only three attempts are allowed.

The flowchart below shows the log on procedure. Several boxes have been left blank.

Complete the flowchart using items from the list.

(b) Sometimes it is necessary to key in the password twice.

Name this type of data check.

[1]

A large cinema uses a computer system to control the air conditioning and also the

5

www.PapaCambridge.com day running of the business (such as booking seats). (a) Using examples from the cinema application, explain the difference between real time transaction processing and real time process control. (b) State two tasks carried out by an operating system. 2 \_\_\_\_\_\_

[2]

.....

(d) Describe one problem with the existing paper-based system that would not be

resolved using the electronic version.

6

A te	elephone company produces paper-based directories. It has decided to offer a rmation to customers via a website.  Give <b>one</b> advantage to the telephone company in doing this.	For ine
(a)	Give <b>one</b> advantage to the telephone company in doing this.	Idge.
	[1]	
(b)	What <b>two</b> advantages does this new system offer the customer?	
	1	
	2	
	[2]	
(c)	Give <b>one</b> disadvantage to the customer of having their details available on the Internet.	

[1]

7 An arrivals board at an airport shows the following information:

			the the	
		8	MAN, Pape	
ivals board at an airpo	ort shows the f	ollowing information	on:	For iner's
Flight Number	Due	From	Information	For iner's
BT 051	13:50	Sao Paulo	landed 13:45	6.60
