CAMBRIDGE INTERNATIONAL EXAMINATIONS

Cambridge International General Certificate of Secondary Education

MARK SCHEME for the May/June 2015 series

0445 DESIGN AND TECHNOLOGY

0445/32 Paper 3 (Resistant Materials), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0445	32

Section A

1	Marking gauge Micrometer Odd legs/odd leg calipers/Jenny[s] calipers.			
	Not calipers			
2	Benefits: new blade is sharper, blades selected to cut different materials, new blade rather than replace whole tool, broken/blunt blades can be replaced, keeps blade sharp. Not different lengths.	(2 × 1)	[2]	
3	Kevlar® Glass reinforced plastic	(1) (1)	[2]	
4	(a) brazing, welding, epoxy resin, Araldite	(1)		
	(b) acrylic/plastic cement, Tensol [cement] Not epoxy resin, Araldite	(1)	[2]	
5	(a) A dowel jointB [corner] bridle joint, open mortise and tenon	(1) (1)	[2]	
	(b) greater surface area to be glued	(1)	[1]	
6	(a) A [circular split] die B tap, plug tap	(1) (1)	[2]	
	(b) cut screw thread on rod/bar, external [male] thread,	(1)	[1]	
	(c) cut screw thread inside hole, internal [female] thread If 'cut a screw thread' is used for (b) and (c) award 1 mark only.	(1)	[1]	
7	Award 0–3 dependent upon technical accuracy	(0-3)	[3]	
	3 marks 2 marks			

Page 3	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0445	32

- 8 Hardwood not seasoned correctly, central heating, table top fixed to legs/rails without allowance for movement (2×1) [2] Award mark to answers relating to the wood drying out due to heat **not** excessive moisture.
- 9 Shape of sander fits into hand comfortably, quick replacement of abrasive paper, dust collection for health and safety, appropriate size to handle (2×1) [2]
- 10 (a) [High density] polyethelene/polythene. [1]
 - (b) Can be recycled [1]

 Not 'it has been recycled'.

Page 4	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – May/June 2015	0445	32

Section B

11	(a)	4 stages: 4×1 Award any practical stage in process: mark out length, mark out centres for holes, cut to length, square cut end, drill holes Do not reward references to glasspaper/cork block	(4)	
		Award 0–1 for technical accuracy Award 1 mark for Technical Accuracy only if minimum 3 stages are given If no sketches are provided maximum mark 3 dependent on overall quality of answer.	(1)	[5]
	(b)	Jig with minimum of 3 holes correctly spaced Award 1 mark for 1 or 2 holes shown only. Award 1 mark only if not correctly spaced.	(0–2)	
		Jig fits over width of strip and block or fits into base board Award 1 mark only if not positively located.	(0–2)	
		'Stopped' at one end Named materials	(0–2) (0–1)	[7]
	(c)	(i) Advantage: preserve, protect, enhance appearance, create interest, more durable/hardwearing	(1)	
		(ii) Disadvantage: paint or varnish can chip and look unattractive, children may put in their mouthNot 'increased cost' or 'takes longer'.	(1)	[2]
	(d)	Specific materials used Appropriate processes 2 relevant/appropriate sizes: e.g. minimum Ø50 of wheel Technical accuracy	(0-1) (0-3) (0-2) (0-2)	[8]
		If CAM/CNC machining is given answers must include details of process; e.g. designed by CAD and downloaded to machine, machine parameters set, material positioned in machine.		
	(e)	Round section wood: dowel		[1]
	(f)	Advantages: inherent colour, self-finished, moulded/intricate shapes possible, hygienic, lightweight, no splinters, durable/hardwearing, better resistance to weathering/external use.	(2 × 1)	[2]

Not cheaper, more attractive, easy to mass produce.

Pa	age (5	Mark Scheme	Syllabus	Pap	
			Cambridge IGCSE – May/June 2015	0445	32	
2	(a)		end lines ard 4 marks for correctly stated sizes even if drawing is not accurate	,	1 × 1) oned.	[4]
	(b)	we we pol	tages, in correct sequence include: e of scraper, t and dry [silicon carbide] abrasive paper [medium grit], t and dry abrasive paper [silicon carbide] [fine grit], ishing mop and compound asso, acrylic polish.	(3	3 × 1)	[3]
		Do Aw	not award marks for any filing process. not award marks for emery cloth. ard 2 stages with different grades of wet and dry paper only. accept 'wet and dry sand paper'.			
	(c)	(i)	Do not award marks for marking out. drill hole in acrylic insert blade of coping saw, Hegner saw, abra file and cut out waste file edges smooth or use of wet and dry paper	;	(1) (1) (1)	[3]
			If chain drilling is described, award 2 marks for chain drilling and 1	mark for fili	ng.	
			If CAM/CNC machining is given answers must include details of pro e.g. designed by CAD and downloaded to machine, machine paran material positioned in machine.			
		(ii)	2 precautions: appropriate drill speed, clamp acrylic securely, slow feed for drill, support under acrylic, use of masking tape, drill puse gradually increasing diameters of drill, little pressure		2 × 1)	[2]
	(d)		thod of softening acrylic: strip heater or line bender not accept oven or hot air gun to heat acrylic.		(1)	
		Cla	propriate shaped former amp acrylic to retain shape chnical accuracy		(1) (1) (1)	[4]
		Aw	ard 1 mark for Technical Accuracy only if minimum 2 stages are prov	vided.		
	(e)	Pra	actical idea: some form of 'shelf' or extended base.		(0–2)	
			propriate materials and constructions ow use of Araldite/epoxy resin only to join acrylic to wood or acrylic t		(0–2)	[4]

Pa	age 6	Mark Scheme	Syllabus	Pap	er
		Cambridge IGCSE – May/June 2015	0445	32	1
	(f)	Do not award marks for marking out. Accept any 3 stages: Use of a wooden former/folding bars/jig	(3	3 × 1)	
		Aluminium sheet secured while bent to shape [vice or cramps] Method of force: mallet or hammer and scrap wood. Do not award marks for hammer without scrap wood.		(O 2)	[3]
	(g)	Accept bending machine: for maximum marks details must be provided Self-finished: no applied finish material is cleaned and prepared with appropriate abrasives	. '	(1) (1)	[2]
13	(a)	Smooth finish, consistent density, relatively easy to cut and shape, no stakes paint well, easier to work with, better finish, finer grain, no need to	o glasspape	er, 2 × 1)	[2]
	(b)	Not 'cheaper'. Rounded corners, appropriate size, interesting puzzle shapes, different lightweight, simple puzzle, tray to keep pieces, pieces too small to swal		3 × 1)	[3]
	(c)	(i) Construction shown clearly Notes to explain alternating grain producing stability/strength		(0–2) (0–1)	[3]
		1 mark 2 marks 1 mark for drawing & 2 marks explanation			
		(ii) Do not award marks for marking out or use of a hole saw to remove Accept any 3 stages from the following: Drill hole inside circular shape Insert blade of appropriate saw and cut out shape or use of Surform to remove most of waste	·	sp	

to remove most of waste

Use of file to make smooth [not rasp]

Use of abrasive paper to make smooth (3×1)

Technical accuracy:

appropriately named saw and file and wood held securely

(0-2)[5]

e.g. coping, Hegner, scroll, fret, pad

e.g. half-round, round or rat tail file

		Cambridge IGCSE – May/June 2015	0445	32	
	(iii)	Top and bottom pieces of plywood shown clamped together At least 2 cramps shown or statement refers to use of cramps plura Suitable glue: PVA, Cascamite, synthetic resin, Gorilla glue.	al.	(0–2)	
		Do not award marks for Araldite/epoxy resin.			
		Suitable cramps: G cramps, F cramps.		(1)	[4]
	(iv)	Two advantages: speed of production, lighter weight, colours available comfortable moulded shape, coloured without painting, easier to classistent quality when batch produced. Do not award marks for 'easier to make', 'cheaper'.	ean,	2 × 1)	[2]
(d)	Cor	mputer Aided Design/Drafting		(1)	
	Cor	mputer Aided Manufacture/Machining		(1)	[2]
(e)	che	o quality control checks applied to the puzzle and/or the tray: cks for dimensional accuracy/sizes/tolerances, overall finish, face finish, consistency of materials used.	(2 × 1)	[2]
(f)	the Use	nufactured boards can be made from recycled materials, refore reducing the impact on the number of trees grown. e of manufactured boards can reduce need for oil based products, stics do not decompose, some manufactured boards use waste mate	erials. (2 × 1)	[2]
