Paper 2 Reading and Writing (Extended)

May/June 2011

2 hours

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer **all** questions.

Dictionaries are **not** allowed.

The number of marks is given in brackets [] at the end of each question or part question.

This document consists of **15** printed pages and **1** blank page.

Exercise 1

Read the following article about the carnival in Rio de Janeiro, and the opposite page.

THE RIO CARNIVAL

- the biggest show in the world?

What is it?

The Rio de Janeiro carnival, held annually in the month of February, is a spectacular celebration of life that attracts millions of people onto the streets of the Brazilian city. The whole country stops to watch, either in the city itself or on the television. It is estimated that each year 700,000 visitors come to watch from all over the world.

“Samba” schools

The music played throughout the carnival procession is called the “samba”. Many participants belong to “samba” schools where they learn to dance and play the music which is so popular throughout Brazil. There are about 30 “samba” schools with thousands of members. They perform for four entire nights in a huge arena called the “Sambadrome”. The schools take part in an official competition and the best of them is awarded a prize. Each school is assessed on its costumes, the theme of its performance and the quality of the music. Some “samba” schools hold street parties and perform in their local areas because many people cannot afford to buy a ticket for the official competition.

From year to year...

Because it is such a huge event, planning for the carnival begins many months in advance. In fact, it is true to say that as soon as one carnival finishes, rehearsals and preparations for the next one begin. Much of this work is done in “Samba City”, which consists of enormous buildings where most of the equipment and costumes are prepared.

The stars of the show

Each school is led by a queen followed by hundreds of drummers and brightly decorated carnival vehicles. The Carnival Queens are the biggest stars and they are chosen from amongst the most beautiful women in each community. As well as beauty, the queen has to be very fit to lead her group of drummers on the slow procession through the streets of Rio.

“Blocos” parades

“Blocos” parades have become an important feature of Rio’s carnival in addition to the “samba” schools. These parades are less formal and include groups of musicians from the same neighbourhood who just want to sing, dance and have a good time. Today, they number more than 100 and the groups increase each year. They all dress in costumes or T-shirts with special themes or logos. Before the show they gather in a square, then parade through sections of the city, before performing near to the beach. Some of them have a particular place such as a café where they play and dance to attract spectators.

(a) How often is the Rio carnival held?

.....

(b) Apart from Brazil, where do the spectators come from?

.....

(c) What is the "Sambadrome"?

..... [1]

(d) What is a "samba" school judged on when it enters the competition? Give **two** details.

.....
..... [1]

(e) Why do some "samba" schools play in their own districts?

..... [1]

(f) How does the size of the event affect the planning?

..... [1]

(g) What are the essential qualities for a Carnival Queen? Give **two** details.

.....
..... [1]

(h) Where are you likely to see the "blocos" perform? Give **two** details.

.....
..... [1]

[Total: 8]

Exercise 2

Read the following article about an unusual library service in Ethiopia, on the opposite page.

The donkey mobile

It is a hot and bright morning in the Ethiopian countryside. Yohannes Gebregeorgis walks beside a pair of donkeys that are pulling a two-wheeled cart. They arrive at the agricultural town of Awassa where Yohannes unties the animals and opens the sides of the cart to display, not the usual vegetables or tools, but children's books. This is the Donkey Mobile Library, the first of its kind in Ethiopia and one of only a few in the world.

Yohannes was born in Ethiopia, North Africa, but trained to be a children's librarian in the USA. He returned to his home country some years ago after more than two decades in America. The yellow cart is full of picture books donated by American libraries, teachers and school children.

Yohannes arranges small painted benches in the shade of the trees, and suddenly Ethiopian children, many of them barefoot, come shouting and racing down every road and path. It's mobile library day! The children circle the bookshelves with great excitement. Until the Donkey Mobile Library began its regular two-monthly visits, many of these children had never seen a book. Now they wait for the library eagerly. Despite the heat, they all sit quietly and listen to Yohannes as he reads aloud to them.

"Without books, education is very dull, like food without salt. You can survive but you can't really come alive," says Yohannes. "The ability to read is the basis for greater productivity, better health and longer life. It is equally important in reading instructions on how to apply the correct amount of fertiliser to the crops in the fields and in how to vote in an election. Even though the children lack material goods, if they have the advantage of books they can imagine a world of possibilities."

For his first job in America, Yohannes suddenly found himself working in the children's section of the main library. He was surrounded by books he had never seen before, and, for the first time in his life, he realised how joyful and imaginative children's literature is. He says, "I always thought of Ethiopia. But how could I bring children's books, with their fascinating characters, to my home country when it had almost no libraries to keep the books in?"

He contacted Jane Kurtz, a writer who was born in America but who had grown up in Ethiopia, and together they founded the organisation, "*Ethiopia Reads*". With gifts of books and money, they created two children's libraries and reading centres and, soon after, the Donkey Mobile Library. Since then, more school libraries have opened, some of them offering training for future librarians.

Inside the Awassa Reading Centre, groups of children, dressed in a variety of different clothes, study the bookshelves for their favourite story. Some of them read at tables or on old sofas. Most of the children say that the library has given them ideas about what they might do in the future. A child called Dareje wants to be a scientist and find a cure for life-threatening diseases. An eleven year-old girl, Fikerte, wants to do research about the moon and discover new facts about outer space. Tamrat, aged 10, lives with his parents and six brothers and sisters in a small house. He doesn't know what he will do with his life, but he loves the library and comes seven days a week.

"What brings you back here day after day?" the librarian asks him.

"The stories," Tamrat replies instantly. "It's the stories that bring me back."

(a) How does the mobile library move from place to place?

.....

(b) How many mobile donkey libraries are there in the world?

.....

(c) How long did Yohannes spend in America?

..... [1]

(d) How do the children behave while Yohannes is storytelling?

..... [1]

(e) Apart from health factors, what advantages are there for these children in being able to read? Give **two** details.

..... [2]

(f) According to the diagram, which organisations donated the most money to the mobile library?

..... [1]

(g) What was the main problem about bringing books back to Ethiopia?

..... [1]

(h) Apart from books, what may be available at school libraries?

..... [1]

(i) Why does Tamrat visit the library every day?

..... [1]

(j) Describe the appearance of the children AND their attitude towards the mobile library. Give **two** details for each.

Appearance

.....

Attitude

..... [4]

[Total: 14]

Exercise 3

Sven Magnusson is a student at Stockholm New World School, Sweden. One day, during a geography lesson when he noticed a poster on the school wall advertising two new magazines. He had no time to stop and read the details but after the lesson he read the contents more carefully.

Sven found out that there was a choice of two magazines, both of them published in Sweden. One of them, *International Nature*, is about the wonders of the natural world. The other magazine, *World Culture*, concentrates more on the history and traditions of different countries. Both magazines are published every two months. Sven is very interested in history and he prefers finding out about how different nationalities and societies developed and the origins of their traditions. He has just joined a group which discusses these issues and he communicates with fellow members by email svemag@stocknet.se. He also keeps in touch by text message on his mobile/cell phone 074839276.

Sven knew that his grandmother, Elke Andersson, was looking for something suitable to buy him for his 17th birthday, which was a few weeks away. The price of the magazines was greatly reduced if they were bought for a young person at school or college. In addition, Sven thought it would be a good idea if he chose the present himself because, in the past, his grandmother had bought him gifts which he didn't really want.

There were three possible ways to subscribe: online, by telephone or by completing a subscription form. Sven thought that filling out the form was the best way to proceed, so he collected a form from the school office and went to see his grandmother to discuss it with her.

His grandmother lives in a district called Norrmalm at 32 Kungsgatan. Sven often calls in to see her after school because he lives in the same road at Apartment 4A. When he arrived he told her about the magazine offer and she agreed immediately to pay for the subscription as a present for his birthday.

Sven and his grandmother had to make a choice of subscription. It was possible to order either 6 issues for one year or 12 issues which would last for two years and would also qualify for an extra 10 per cent discount. The subscription for one year would cost 180 Swedish Krona (SK) and for two years the cost would be 324 SK. His grandmother was happy to pay a little more for his birthday present and so they chose the subscription for a longer period.

The most suitable way for his grandmother to pay for the subscription was by cheque because she disliked paying for anything on credit. So she signed the cheque and handed it to Sven to post with the completed subscription form.

Imagine you are Sven. Fill in the form on the opposite page, using the information above.

Magazine Subscription form

Section A Magazine Details

Title of selected magazine (please circle): *International Nature*

YES! Please send me 6 issues

YES! Please send me 12 issues (please tick one box)

Where you saw the magazine offer advertised:

Section B Subscriber Personal Details

Full name:

Address:

Email address: Mobile/cell phone number:

Are you a student? YES / NO (please delete) If YES, please state age:

Name of school or college:

Section C Payment Details

Full name of person paying (if different from above):

Relationship to subscriber (please complete as appropriate)

Parent Friend Other (please specify):

Payment details: Cheque Cash Credit/Debit card (please underline one)

If paying by cheque, please write the amount here:
OR

If paying by credit/debit card, please write the number:

Section D

In the space below, write **one** sentence of between 12 and 20 words, giving a reason for your choice of magazine.

Exercise 4

Read the following article about the development of a flying car, and the opposite page.

PASSENGERS... YOUR CAR... READY FOR TAKE-OFF

The flying car has been talked about for many years, but now it appears that the idea is about to become a reality.

An international company has built a two-seater plane that, at the touch of a button, converts into a car which is perfectly suitable for driving on public roads. It has been designed so that the wings fold up automatically, and it takes just 15 seconds to switch between flying and driving. With its wings fully open and the propeller spinning, the flying car can take off from any airfield. The hope is that it will eventually take off from roads, but at the moment that is still illegal.

New technology means that the inside of the plane's cockpit is quite similar to the inside of a car. Reaching your destination can be made easier by satellite navigation systems, and weather patterns can be displayed on a simple colour screen. The lightweight engine means that it can fly up to 500 miles without the need to refuel.

It would seem that cars which can fly make complete sense. They are quicker than conventional cars for travelling from city to city, and they can run on ordinary unleaded fuel. They have another big advantage. Flying cars are cool, like something you would see in an action film.

At the moment, however, the flying car's wheels have not left the ground. That is not because of technical reasons or problems with the design. It is because the various road and aircraft authorities simply cannot agree on whether it is a car or a plane.

"The Government and the authorities have never thought seriously about a flying car," says Alan Price, the president of the company that has developed it. "I wanted a car that could fly and drive, but it is difficult to find an organisation prepared to insure the vehicle against accidents."

Nevertheless, the company hopes to produce and deliver its first flying car soon. The company already has orders for 40 of them. The majority of the potential customers are older and some are retired. They have worked hard all their lives and now they can have a flying car... a form of technology that they have been promised in films and on television since they were children. There have even been orders from some people who have no pilot's licence, but are willing to learn to fly because of the excitement of owning such a vehicle.

The flying car will cost around \$200,000. "For an airplane, that's a very reasonable price, but for a car, it's quite expensive," explains Alan Price. "But it just is not possible to make a \$10,000 flying car yet."

This latest means of transport will not become a mass-market item at any time in the near future. But in the long term it has the potential to change the way you travel. It will become no more expensive than driving your car on the motorway. Journey times could be reduced by more than half.

So the next time you are told to fasten your seat belt, it may be to prepare for take-off.

You are going to give a presentation to your school's Technology Club. Prepare some notes to use as the basis for your talk.

Make your notes under each heading.

Design features of the flying car

Exercise 5

Read the following article about elephants painting pictures. **On summary about the role and responsibilities of the keepers of the**

Your summary should be about 100 words (and no more than 12 words as far as possible.

You will receive up to 6 marks for the content of your summary, and accuracy of your language.

Elephants – real artists or not?

So is it true that elephants are artists? Can they really paint pictures of flowers, trees or even other elephants?

It's hard to believe, but in Thailand there are at least six centres where elephants display their talents as painters. In the past, these animals had always lived and worked closely with humans. But when there was no longer work for them, elephant sanctuaries were established for their protection because they had little chance of survival in the wild. Here the role of the keeper is vital in forming a relationship with his chosen elephant. Many visitors came to see the elephants and the idea of the painting session developed out of this.

The Nong Nooch Tropical Garden is a large recreational park, 9 miles from the seaside town of Pattaya in Thailand. In the centre of the park is a square arena for the daily elephant displays. To a certain extent, these displays are like traditional circus acts, but they are different in two important respects.

Firstly, each of the three animals has its own keeper, who devotes his whole life to looking after his particular elephant. Secondly, much of the daily performance is designed to make the audience admire the skills of the elephants rather than laugh at them as overgrown clowns.

So are these enormous mammals truly artistic? To start the performance, the keeper positions his elephant in front of a heavy wooden frame, which supports a large piece of card. He then pushes the brush gently into the end of the elephant's trunk and the animal starts to make lines on the card. When the brush is empty, the keeper takes it and replaces it with another loaded one, and the painting continues until the picture is complete. The elephant then turns towards the audience, bows down low and is given a feast of bananas by the keeper as a reward.

The paintings are then removed from their frames and offered for sale. They are quickly bought by people who have been amazed by what they have seen. To most members of the audience, what they have witnessed appears to be truly miraculous; but what the spectators overlook are the actions of the keepers as their animals are at work. This oversight is understandable because it is very difficult to move your eyes away from the brushes that are making the lines and the spots. However, if you do so, you will notice that with each mark, the keeper pulls at his elephant's ear. He pulls the ear up and down to get the elephant to make a vertical line, or, alternatively, pulls it sideways to get a horizontal one. To make spots, the keeper moves the ear forward towards the painting. Throughout the performance, it is the keeper who controls the routine.

Further investigation also reveals that each of the three elephants always produces the same image, time after time, day after day, week after week. Mook always paints a bunch of flowers, Christmas always does a tree, and Pimtong a climbing plant. This makes it seem like a circus trick... but it is, nevertheless, an amazingly clever trick! After all, no human hand touches the elephant's trunk, and the brain of the animal has to translate the small touches on its ear into attractive lines and spots.

Perhaps one day these elephants will be allowed to express themselves independently. If that happens we will have to think seriously about an elephant art gallery.

Exercise 6

You like to watch television every day. At the beginning of the school holidays your television suddenly broke down. It took two weeks to repair.

Write a letter to a friend, explaining:

- how you first reacted to the breakdown of the television;
- how you spent your time instead of watching television;
- what you learnt from the experience.

Any one of the pictures above may give you ideas, but you are free to use any ideas of your own.

Your letter should be between 150 and 200 words long. Do not write an address.

You will receive up to 9 marks for the content of your letter, and up to 9 marks for the style and accuracy of your language.

Exercise 7

Some people say that there is too much pressure on young people to look after their health.

Here are some comments from your friends about the subject:

"I think we all have a responsibility to look after our own health."

"If we are fit and healthy, we feel good and have more energy for work and play."

"I don't want to be told what I should and shouldn't eat for every meal."

"There is too much publicity about the need for exercise - I prefer just to laze around."

Write an article for your school magazine giving your views about the issue.

Your article should be between 150 and 200 words long.

The comments above may give you some ideas but you are free to use any ideas of your own.

You will receive up to 9 marks for the content of your article, and up to 9 marks for the style and accuracy of your language.
