CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2012 series

0680 ENVIRONMENTAL MANAGEMENT

0680/13 Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Page 2	Mark Scheme S	Syllabus	
	IGCSE – October/November 2012	0680	
Mark schemes	s will use these abbreviations:	Call	
• ;	separates marking points	On	
• /	alternatives	The state of the s	
• ®	reject	· C	
• A	accept (for answers correctly cued by the question)		3
• (l)	ignore		V
- ^\//	alternative wording (where recognized year, more than u	·oual\	

Mark schemes will use these abbreviations:

AW alternative wording (where responses vary more than usual)

additional valid point (where there are a variety of possible additional valid **AVP**

answers)

actual word given must be used by candidate (grammatical variants excepted) <u>underline</u> D, L, T, Q quality of drawing / labelling / table / writing as indicated by mark scheme

indicates the maximum number of marks that can be given max

equivalent eq

ORA or reverse argument

IDEA OF where candidates are expected to make an argument which expresses a particular

idea, but the ways in which they will do this will be many and varied

	IGCSE – October/November 2012	0680	100

(a) (i) correct plot;; (one mark for accurately placing each line between the sectors) key;

(ii) water vapour / methane / carbon dioxide / CFC; two correct for 1 mark

[1]

- (b) (i) acid rain;
 - (ii) NO_x: road / sea / air transport / power stations / industry; SO₂: power stations / industry;

[2]

(iii) road transport:

public transport;

cycle;

walking;

car share;

install catalytic converter;

power stations:

scrubber / catalyst;

detail;

use of alternative energy;

insulation / eq in home;

industry;

scrubber / catalyst;

detail;

[3]

[Total: 10]

2 (a) (i) bauxite

only in old rocks;

nut not in all old rocks shown;

copper

in old and fold mountains / young rocks;

mainly in Americas;

gold

in old and fold mountains / young rocks;

in all rocks shown;

iron ore

only in old rocks;

in all old rocks;

[4]

(ii) workers have to endure high temperatures;

tunnel collapse / eq;

breathing problems / lung diseases;

floods;

explosions; [3]

Р	age 4	1		Mark Scheme	Syllabus
				IGCSE – October/November 2012	0680
(b) adı	/antag	ges:	foreign exchange; increase imports of wanted goods; any relevant impact of this on infrastructure	Syllabus Cannung Cannu
	dis	advar	ntages:	environment via pollution; visual / noise / air;	
				reference effect on tourism;	[3
					[Total: 10
(a)) (i)	рорі	ulation:	group of organisms / animals / plants (of s	ame species) living together; [1
		habi	itat:	where an organism lives;	[1
		nich	e:	what an organism does in ecosystem (awa	ard example, e.g. carnivore eq)[1
		com	munity:	group of populations in an area;	[1
	(ii)	spre wax stora	ry hairs		[3
(b) <i>A</i>			ad to more efficient use of existing farm land d clearance / deforestation	d:
	В	The	y can be	e made to be pest resistant: e of pesticide	
	С	The	y can be	e made to be herbicide tolerant: e of herbicide / better weed control	
	D	The	ir use m	ay create 'super weeds' without natural cont versity due to competition	trols:
	_			rol oran variation will decrease:	

E Use of natural crop varieties will decrease: loss of biodiversity

any 3 for max 3

Their cultivation could lead to greater use of herbicides: loss of biodiversity

	Pac	je 5	Mark Scheme	Syllabus	0
	. 4900		IGCSE – October/November 2012	0680	OD .
4	(a)	(i)	1.4 (billion km ³) × 0.03 or (1.4 × 3) / 100; = 0.04 / 0.042 (billion km ³); A any equivalent figure with appropriate units		Dapa Cambridge
		(ii)	water evaporates from the sea; condenses to form clouds; falls to land in precipitation; re enters atmosphere in transpiration; from plants; goes back to sea in runoff; any three in correct context		[3]
	(b)	(i)	100 (in centre column) and 20% (in last column); both correct for 1 mark		[1]
	((ii)	 C / pie graph; good reason; (e.g. discontinuous data, easy comparise OR A / bar chart: good reason; (e.g. discontinuous data, easy comparise 	,	[2]
	(i	iii)	bilharzia: water-based; drainage;		
			typhoid: water-borne; water treatment;		
			cholera: water-borne; water treatment;		
			malaria: water-bred; drainage / vector eradication;		
			marks for any pair in correct context (no mark for disea	ase)	[2]
					[Total: 10]
5	(a)	(i)	light; chlorophyll; A either order		[2]
	((ii)	minerals / named relevant mineral;		

(iii) trees \rightarrow insects \rightarrow mice \rightarrow foxes;;; (note direction of arrows – if wrong, -1)

(from the) soil;

[2]

[3]

Page 6	Mark Scheme	Syllabus
	IGCSE – October/November 2012	0680
less soil dec	re light; s rain; s food so fewer insects / all other things that depend erosion increases; reased biodiversity; itat loss;	Syllabus 0680 / named e.g.;
		[Total: 1
(a) (i)	500 km; A 450-550	
(ii)	flood control; irrigation; HEP; drought avoidance;	
(iii)	(water based) diseases increase; loss of farmland / villages eq / archaeological sites; clearer water downstream; more algal growth; greater costs of water treatment;	
(b) (i)	fish;	
. , , , ,	oil; tidal / wave power; transport;	
(ii)	fish: overfishing; collapse of food chains;	
	oil:	

pollution;

one consequence described;

tidal / wave power:

changes water currents / eq;

changed sediment deposition / affects bird-life / affects fish;

transport:

causes oil pollution / pollution by plastic waste; one consequence described;

[Total: 10]
