

**MARK SCHEME for the October/November 2009 question paper
for the guidance of teachers**

5129 COMBINED SCIENCE

5129/02

Paper 2 (Core Theory), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus
	GCE O LEVEL – October/November 2009	5129

- 1 (a) compound / made up of / consists of carbon and hydrogen only
(mixture = 0)
- (b) oxygen / O₂ [1]
- (c) (i) carbon dioxide / CO₂
water / H₂O / steam (either order) [2]
- (ii) carbon monoxide / CO [1]
- (d) oxides of nitrogen / lead (compounds) [1]
not sulfur dioxide / carbon monoxide / carbon dioxide
- 2 (a) carbon dioxide / CO₂
oxygen / O₂ (correct order) [2]
- (b) (i) carbon dioxide (level) / temperature / the plant [1]
not light
- (ii) graph increasing with increasing intensity [2]
maximum being reached / levelling off
independent marks; decreasing graph loses first mark
- (c) food / oxygen / animals eat plants [1]
light and water are a list but energy is insufficient
- 3 (a) (i) line at 30m/s for first 20s [2]
straight line from 30m/s at 20s up to 50 m/s at 40s
ignore line above 40s
- (ii) velocity has direction / is a vector [2]
speed has no direction / is a scalar
only velocity has direction = 2
- (b) F = ma or a = F/m or 5100/1500 [3]
(correct formula always gets mark)
= 3.4
m/s²
(unit independent of answer)

Page 3	Mark Scheme: Teachers' version	Syllabus
	GCE O LEVEL – October/November 2009	5129

- 4 (a) B
- (b) (i) C
- (ii) reacts with water [1]
reason is independent of letter but incorrect list for C loses mark
- (c) (i) E [1]
- (ii) conducts electricity when melted }
high melting point / melts at 772 (°C) } any 2 [2]
soluble in water }
reasons are independent of the letter }
- 5 (a) fruit wall [1]
- (b) testa / seed coat
not testis / testes
cotyledon
plumule [3]
- (c) allows colonisation of new areas / grow in other places
prevents overcrowding / competition [1]
(not spread seeds alone)
- 6 (a) hydroelectric
potential
(not gravitational alone as not in words in question)
chemical
solar [4]
- 7 (a) halogens [1]
- (b) gas (to liquid) to solid [1]
- (c) iodine / I₂
potassium bromide / KBr (either order) [2]
- (d) remove / destroy / kill bacteria / germs / microbes
safe to drink is insufficient [1]

Page 4	Mark Scheme: Teachers' version	Syllabus
	GCE O LEVEL – October/November 2009	5129

- 8 (a) (artery has) less carbon dioxide
more oxygen
more glucose
is at higher pressure } any 2
(if not stated assume answer is about artery)
- (b) (artery has) thick(er) wall
no valves
narrower lumen
more muscle tissue
more elastic tissue } any 2
(if not stated assume answer is about artery) [2]
- (c) obesity
high fat diet
lack of exercise
drinking (large amounts of) alcohol
stress } any 2 [2]
- 9 (a) (i) 0.4 [1]
(ii) 0.8 [1]
- (b) speed
strength of magnet / strong magnet
length of wire (in field)
distance between magnets } any 2
(bigger and length alone are insufficient) [2]
- 10 (a) 4 points plotted correctly = 2 (+/- ½ square) [2]
2 or 3 points plotted correctly = 1 [1]
best fit straight line (between given points)
- (b) (i) 740–760 cm³ or correct reading from graph [1]
(ii) (b) (i) × 32 = 24000 cm³ (ecf) [1]
- (c) glowing splint
relights
(result is dependent on the test) [2]
- 11 (a) oxygen
alveoli
diffusion
carbon dioxide [4]

Page 5	Mark Scheme: Teachers' version	Syllabus
	GCE O LEVEL – October/November 2009	5129

www.PapaCambridge.com

- (b) (expired air) more carbon dioxide
 less oxygen
 more water vapour
 higher temperature / warmer } any 3

12 (a) any insulator e.g. rubber, plastic, wood [1]

- (b) heated air expands
 becomes less dense
 heated air rises
 cold air falls (to replace it) } any 3 [3]

(c) black is better absorber / good absorber
 (ignore emitter) [1]

13 (a) ink is soluble in water / pencil is insoluble in water / ink would run etc. [1]

(b) red
 yellow (either order)
 (list up to –2 marks) [2]

(c) brown [1]

14 (a) C
 optimum pH and temperature
 most suitable / works best at pH and temperature [2]
 (reason is dependent on tube letter)
 tube C can be identified by stating conditions
 works best at 35 °C and pH 7 = 2 marks

- (b) (i) amylase
 (ii) starch
 (iii) sugar / maltose / glucose [3]

15 (a) rays converge to central point
 central ray does not deviate
 (independent marks) [2]

(b) (i) *i* correct
r correct [2]

(ii) refractive index [1]

Page 6	Mark Scheme: Teachers' version	Syllabus
	GCE O LEVEL – October/November 2009	5129

www.PapaCambridge.com

- (iii) gamma / γ
 X rays
 ultra violet / uv
 micro(waves)
 radio(waves) } any 2 [2]

- 16 (a) protons neutrons (either order)
 electrons lost
 element isotopes
 protons electrons (either order)
 (1 mark for **each pair** of answers) [4]

- (b) 136 [1]

- 17 (a) X on cervix [1]

(i) ovary

(ii) oviduct / fallopian tube

(iii) uterus (wall) / womb [3]

- (c) fusion of male / sperm and female gametes / egg / nuclei
 (an indication of joining is required – meet is insufficient) [1]

- 18 (a) arrow vertically down (anywhere on diagram) [1]

- (b) 6.0×0.4
 $= 2.4$
 Nm [2]
 (unit is independent)

- (c) (b) / 0.6 OR force = moment / distance or variation
 $= 4.0$ [2]
 (ecf from (b))
 ($6.0 \times 0.4 = f \times 0.6$ gains first mark)
 (4 alone = 2 marks)
