# **Further Mathematics**

Unit 4 Discrete and Decision Mathematics

\*GFM41\*

[GFM41] THURSDAY 20 JUNE, AFTERNOON

#### TIME

1 hour.

#### INSTRUCTIONS TO CANDIDATES

Write your Centre Number and Candidate Number in the spaces provided at the top of this page. **You must answer the questions in the spaces provided.** 

Do not write outside the boxed area on each page.

Complete in black ink only. Do not write with a gel pen.

All working **must** be clearly shown in the spaces provided. Marks may be awarded for partially correct solutions.

Answer all seven questions.

#### INFORMATION FOR CANDIDATES

The total mark for this paper is 50. Figures in brackets printed down the right-hand side of pages indicate the marks awarded to each question or part question. You may use a calculator.

**3** Paula, the manager of a hotel, is organising staff to act as servers at a wedding reception.

She will use *x* full-time workers from the hotel and call in *y* part-time workers to make up the number of servers who will be employed at the reception.

Each full-time worker will earn £100 and each part-time worker will earn £60

- (i) The selection of servers is subject to four restrictions:
  - (1) At least 16 servers will be required.
    - (a) Express this condition as an inequality.

Answer

(2) The total amount paid to servers must not exceed  $\pounds 1500$ 

(b) Show that  $5x + 3y \le 75$ 

11897

# 

\*20GFM4104\*

[1]

[1]

(3) There must be at least one full-time worker for every two part-time workers,

i.e. 
$$x \ge \frac{y}{2}$$

(4) No more than 10 full-time workers will be available,

i.e. 
$$x \le 10$$

(ii) Illustrate the four inequalities by a suitable diagram on the graph below.

Identify with the letter  $\mathbf{R}$  the region containing the set of points satisfying all four inequalities.

Use your solution set to find

(iii) the minimum number and the maximum number of part-time workers who may be employed,

Answer Minimum number [1]

Maximum number [1]

(iv) the maximum total number of servers who could be employed at the reception,

Answer [1]

- 4 The letters *p* and *q* represent two statements, each of which may be true or false.
  - (i) By completing the truth table below, express the compound statement

(p and not q) or (not p and q) or (p and q)

by a simple statement involving one occurrence each of p and q.

p	q	not p	not q	p and not q	not p and q	p and q	Compound statement
Т	Т						
Т	F						
F	Т						
F	F						

Answer Simple Statement

# 

\*20GFM4108\*

[5]

(ii)	Hence suggest a simpler statement equivalent to:	
	Freda feels cold and Geoff doesn't feel hungry,	
	or Freda doesn't feel cold and Geoff feels hungry,	
	or Freda feels cold and Geoff feels hungry.

- 5 Ciaran, a manager at a local leisure centre complex, recorded the attendances (in thousands) over a three-year period. The attendances for 2016–2018 are summarised in the table below.

Year	Jan–Mar	Apr–Jun	Jul–Sep	Oct–Dec
2016	180	165	172	155
2017	164	145	160	141
2018	153	132	148	127

These data have been plotted on the graph below.

# 

\*20GFM4110\*

(i)	Calculate 4-point moving averages to smooth the data, using the information below.	
	180	
	165

- **6** The diagram below shows the activity network used to model a school improvement project. The activities involved are labelled A, B, C, D, E, F, G, H, I, J, K and are represented by the edges. Each activity requires one staff member.

The number on each edge represents the time, in days, required to complete that activity.

(i) Complete the diagram above by filling in the missing early times and late times.
